PARROT DF7700+

The MMS digital photo frame and text messaging

Share your photos wherever you are, thanks to the Parrot DF7700+. With its dedicated number, you can send your photos straight to the Parrot DF7700+ from your mobile phone. Even more incredible: comment your trip by joining a text to your photo. The text will appear along with the photo on the frame! For even greater compatibility, it also features a USB port and an SD card slot. At last, you can make the most of the photos stored on your mobile phone, PC, Mac® or digital camera by transferring them to the Parrot DF7700+.

Keep your mind free

By easily setting the time at which you want the Parrot DF7700+ to automatically switch on and off every day, you will stop wasting energy! Moreover, manage easily all your contacts by choosing to integrate or not a new sender to your authorized contacts list. All non desired sender will not be able to send photos on your frame.

Share all the magic of your holidays easily

Going on a long journey? Do not wait until you get home to share your experiences! With the Parrot DF7700+, send your favourite photos wirelessly and with the press of a button straight to your parents' or friends' frame! They will not have to do anything except join you in admiring the magic of your journey. The ultra-intuitive user interface will enable them to adjust the photos as they want and create a personalised slideshow. Friends, family give the frame number to whoever you want and share your photos anytime.

The contemporary photo album

The Parrot DF7700+ is a true electronic album: it stores up to 400 photos in its internal memory. With its leather frame and sleek finish, the Parrot DF7700+ is a real little gem. More than enticing, it offers your photos all the elegance that they deserve.

Breathing life into your photos

With its high-resolution 7-inch digital TFT LCD screen and 262 144 colours, the Parrot DF7700+ reproduces rich pictures in terms of colour and contrast. You will re-live all your biggest moments. Irrespective of the photo's size, the Parrot DF7700+ automatically adjusts it the picture to match the size of its screen. Position the frame how you want, either horizontally or vertically, and the photos will automatically be rotated.

Brightness suited to all surroundings

The backlight of the Parrot DF7700+ screen constantly adjusts to the brightness of your rooms. The optical sensor acts like a dimmer switch; it increases or reduces the screen brightness according to the surrounding light. Less light at night, more light during the day. Your photos will keep all their sparkle.
