## PARROT PARTY Black Edition

### Your portable wireless audio system

The Parrot Party Black Edition is the portable and ultra-compact wireless audio system that allows you to take your music wherever you go, both indoors and out. Its rechargeable battery offers over eight hours' continuous playback for listening alone or sharing with your friends. At last, the music on your mobile phone will get the extraordinary sound quality that it deserves.

### Unlimited sharing

Say goodbye to that crackly, tinny sound from your mobile phone's speaker when playing your music. Now stream your tracks to high-quality speakers! Easily listen to your playlist from any *Bluetooth* stereo (A2DP) source, such as a mobile phone, PC or Mac® (with OS Leopard)... or plug in all your analogue audio devices (MP3 and CD players, etc.) into the line-in socket. All your friends will be able to use the Parrot Party Black Edition and share their music with you!

### High-quality sound

You will be bowled over by the sound quality of the Parrot Party Black Edition, featuring unrivalled acoustics that belie such a compact-sized system. Rock, Pop, Jazz, R'n'B... crank up the volume and let yourself be carried away by the incredible sound effects, carefully mastered by Parrot's acoustics engineers. Stereo Widening provides an auditorium-type effect. Virtual SuperBass reinforces the bass frequencies and gives them greater punch.

### The first NFC-compatible speakers

The Parrot Party Black Edition is the first stereo speaker system marketed with the NFC near field communication technology, offering seamless pairing and increased user-friendliness. Say goodbye to trawling through the menus on your *Bluetooth* mobile phone trying to find the option for pairing it with your Parrot speakers: simply brush the Parrot Party Black Edition past your NFC phone and the selected music is automatically played!

### A modern trendy colour

The design of the Parrot Party Black Edition is a real pleasure for the eyes and ears. You will be so proud of your Parrot Party Black Edition and its modern, trendy design that you will rush to show your friends.

# Release the sounds from your mobile phone with the Parrot Party Black Edition

## Wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo (A2DP) profile uses the same short distance radio frequencies to transport musical files from one peripheral to another one.

## NFC wireless technology

With the NFC (Near Field Communication) wireless technology, data can be exchanged intuitively and easily with security guaranteed. Communication is established by bringing two NFC-compatible electronic devices within a few centimetres of each other. NFC and *Bluetooth* can be combined to simplify the stages involved in configuring and connecting devices, making the use of both protocols completely seamless for the user. The NFC technology therefore increases the communication and application possibilities for electronic devices, while simplifying their use.

## Phone & device compatibility

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Refer to [www.parrot.com](http://www.parrot.com)

## Technical and commercial specifications

### PARROT PARTY Black Edition

Portable *Bluetooth* stereo 2.0 speakers

#### Specifications

2-channel stereophonic system  
Two wideband drivers

Class-D amplifier with 2 x 3 W output

5-button user interface + On/Off button

Indicators: 3 LEDs (*Bluetooth*, audio effects) including a blue/red/violet LED

Settings: volume, mute, reset, audio effects

Modes: Normal, Pairing, Low power, Low battery

Compatible sources\*:

- *Bluetooth* stereo (A2DP) devices
- Analogue audio decoders

Built-in SBC decoder

Audio effects:

- Stereo Widening
- Virtual SuperBass

Power output: 6 W RMS

Maximum battery life: 8 hr

Frequency range: 150 Hz – 20 kHz

Analogue line-in socket: 3.5 mm jack

Power supply: 2100 mAh NiMH rechargeable battery or 100 / 240 V mains charger, 50 Hz and 60 Hz

PC software: Parrot Audio Suite, volume control, 7-band equaliser...

### *Bluetooth*

*Bluetooth* v2.0 + EDR

Profiles supported:

A2DP (Advanced Audio Distribution Profile)  
AVRCP (Audio Video Remote Control Profile)

Maximum range: 10 meters

Pairing: by PIN code (0000)

Updates via *Bluetooth*

### NFC

New technology: Saves you from having to search for *Bluetooth* peripherals

### Dimensions

Length: 228 mm      Height: 79 mm  
Depth: 85 mm      Weight: 650 g

### Electrical specifications

Operating voltage: 4.8 V (Batteries) - 15 V (DC)

Low Power mode consumption: < 125 mW max

### Documentation

User guide included. For further information, visit our websites: [www.parrot.com](http://www.parrot.com) and [www.parrotsound.com](http://www.parrotsound.com)

\* Compatible with *Bluetooth* A2DP mobile phones, PCs with *Bluetooth* A2DP functionality or equipped with a *Bluetooth* USB dongle, *Bluetooth* A2DP MP3 players, players equipped with a *Bluetooth* audio dongle and all conventional analogue devices.
