

PARROT Minikit

SQUAWK BOX Cost: £99 Details: www.parrot.net

Bluetooth 'sperts Parrot have unleashed another product on the UK market – the Parrot MINIKIT is a Bluetooth hands-free kit for your moby – the selling point for this particular hands free device over others is that it can be taken anywhere and is designed for use not only in your car but at also work or even at home if you find yourself needing your hands free during conversation. The sound is particularly good – thank the very latest generation of DSP-2 signal processing algorithms and a high-definition 2W speaker for crystal clear convos, in fact, the only thing it loses points on is design – if you're gonna make something designed to take everywhere then at least give it the looks so we'd want to take it anywhere.
