

Handsfree  
Car Kit

# CK3100

Drive, Talk, Be !

[www.parrot.biz](http://www.parrot.biz)

## Find your mobile phone's information on a small LCD screen

The kit displays your mobile phone's information on an LCD screen : incoming call number, phonebook, last number called, and so on. The ingenious screen can be installed wherever users want on the dashboard and provides an optimized viewing angle for greater comfort and readability.

## Choose a kit that integrates seamlessly into your car for real audio quality

The car's speakers accurately reproduce the caller's voice. The microphone captures the sound of your voice while filtering out the surrounding noise. In the event of a call, the car radio automatically cuts out to allow for a smooth conversation.

## Make calls in complete safety with the voice recognition feature

When users get in their car, they start the engine and the kit immediately connects to their mobile phone. Thanks to the voice recognition feature, drivers say a name and the kit automatically dials the number in complete safety.

## Take advantage of the universal Bluetooth® solution

The CK3100 is compatible with all Bluetooth® mobile phones on the market.
