Parrot PARTY

Portable wireless soundbox

Light and compact – only 620g – the Parrot PARTY is the mobile soundbox that follows you everywhere you go. Equipped with a rechargeable built-in battery, it provides you with more than 4 hours of uninterrupted music, listening alone or with some friends, in your house or out on the move. Your preferred musics won't now have any limits.

Stereo sound 6W

The Parrot Party provides an incredible quality of sound for a device of such a dimension: a Class-D amplifier and two wide-band speakers whose response curve was recalculated. The sound is dynamic, clear and detailed. Two astonishing audio effects created by Parrot will finish convincing you. The first effect - Stereo Widening - widens stereophony with the manner of an auditorium. The second effect – Virtual SuperBass – reinforces the bass frequencies and gives them punch.

Sound on the Move

The technology of the Parrot PARTY and its optimized acoustics is adapted to all the styles of music. From rock'n'roll to R n'B while not forgetting pop, it offers a perfect feeling of realism. Relax at home or out and about with your favorite lounge music or escape with crazy rhythms!

Designed for your hands, your eyes... and your ears

Tempting curves, tested robustness and neatly designed... Parrot PARTY is portable, innovative and modern. Compact - only 23cm length - this soundbox is entirely dedicated to your pleasure, pleasures of your eyes and your ears. Designed for you wherever you are!

Mobile, PC, MP3 or CD player... this is your choice

Without either installation of specific software nor special configuration, send and listen to your playlist playing from any *Bluetooth* Stereo (A2DP) source: *Bluetooth* A2DP mobile phone, *Bluetooth* enabled PC computers, *Bluetooth* MP3 players... The Parrot PARTY also plays music from any analogue music devices, thanks to the Line-In input: CD player, standard MP3 player, MD recorder. The Parrot PARTY detects automatically the source of music, *Bluetooth* or Line-In. Enrich your musical experience with a stereo avant-gardist soundbox, simple to use and dedicated to current and future technologies.

What about carrying your favourite band in your pocket ?

Wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo (A2DP) profile uses the same short distance radio frequencies to transport musical files from one peripheral to another one.

Phone & device compatibility

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Refer to www.parrot.com
Example: Asus, Audiovox, BenQ, BlackBerry, Eten, Grundig, HP, HTC, I-Mate, LG, Motorola, NEC, Nokia, Palm Treo, Panasonic, Qtek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony Ericsson, SPV, Telital, VK mobile...
