Parrot USB DONGLE

(Featuring Bluetooth Stereo 2.0)

A multipurpose *Bluetooth* dongle

The Parrot DONGLE lets you transform any PC or laptop into a data and music source for all *Bluetooth* devices and equipment.

For sending photos...

This latest generation *Bluetooth* dongle easily and instantly transfers your best photos to the Parrot PHOTO VIEWER or any other *Bluetooth* device featuring a screen.

For streaming your music...

What could be more enjoyable than listening to your own playlist in MP3 or any other format by streaming the music by *Bluetooth* to the Parrot BOOMBOX or Parrot PARTY. Discover all the freedom and fun of listening to music wirelessly!

And for transferring your files

The Parrot DONGLE incorporates *Bluetooth* v2.0 + EDR, allowing ultra-fast file transfers without needing any cables or software.

Universal compatibility

The Parrot DONGLE works with all PCs with a USB 2.0 interface.

Free your computer files

Wireless technology

Bluetooth wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The Bluetooth Stereo (A2DP) profile uses the same short distance radio frequencies to transport music files from one peripheral to another.

Phone & device compatibility

As Parrot products are 100% Bluetooth compatible, they are compatible with almost every Bluetooth mobile phone. Refer to www.parrot.com

Example: Asus, Audiovox, BenQ, BlackBerry, Eten, Grundig, HP, HTC, I-Mate, LG, Motorola, NEC, Nokia, Palm Treo, Panasonic, Qtek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony Ericsson, SPV, Telital, VK mobile and many others.
