

PARROT MINIKIT

Bluetooth® Hands-free speakerphone

www.parrot.com

The new Parrot MINIKIT is the most versatile hands-free device available anywhere. It's compact, wireless and lightweight so you can take it with you wherever you go.

It goes everywhere you do

When driving, simply clip it to your vehicle's sun visor. At your destination, it can easily be slipped into your pocket thanks to its small size and lightweight design - a mere 3.5 oz. It has its own battery that provides 10 hours of talk time and more than one week on standby. Use it at home, in your office, in your car - everywhere.

It recognizes your voice

The Parrot MINIKIT is designed to simplify calling with your cell phone with user-defined voicetags (max. 150/phone). It uses its own voice recognition feature, not the phone's, so you don't have to touch your phone while driving.

High-fidelity sound

The Parrot MINIKIT is a *Bluetooth* hands-free mobile speakerphone. It features the very latest generation of DSP-2 signal processing algorithms and a high-definition, 2-watt speaker for crystal-clear conversations in any situation.

Home charger

Wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices.

Phone compatibility

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Please refer to www.parrot.com
