Parrot

## Company Profile

Established in 1994 by its Founder, Chairman & CEO, Henri Seydoux, and located in Paris, Parrot S.A. is a highly profitable, fast-growing company that provides proven and reliable *Bluetooth*<sup>®</sup> wireless technology for a full range of highly desirable consumer products.

Today, Parrot has a major international focus, both in terms of its client base, with nearly 90% of sales generated outside of France, and in terms of its production, outsourced to carefully controlled and selected partners which enables the company to maintain a high level of quality and customer responsiveness.

As a result, Parrot is now particularly well positioned to capitalize on the bright future opening up for mobile telephone devices and *Bluetooth* in general.

# 01

## Quality

A major focus of Parrot is the quality of its products. That is why the company spends so much time developing well conceived and competitively positioned products that suit the consumer's lifestyle.

# 02

## Wireless expertise

*Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. It extends the communication possibilities for mobile phones and a large number of other devices. The *Bluetooth* Stereo (A2DP) profile uses the same short distance radio frequencies to transport music files from one peripheral to another. All Parrot audio products feature AVRCP which is a *Bluetooth* profile enabling the user to control a number of settings (like volume, for example) directly from the music source such as *Bluetooth* A2DP-enabled mobile phones, PCs, Mac® computers with OS X Leopard and others.

# 03

## Easy to use

Parrot has always used advanced technology to make products that are easy and convenient to use. We believe that the goal of technology should be to simplify your life.

# 04

## Personalized after-sales service

In order to support purchasers of our products, Parrot maintains a dedicated hotline and a web forum via the [www.parrot.com](http://www.parrot.com) web site. At this site, we also provide downloadable versions of the latest software for our products so they'll always function properly with the new cell phones reaching the market.

### Wireless technology

The *Bluetooth* wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices. The *Bluetooth* Stereo (A2DP) profile uses the same short distance radio frequencies to transport musical files from one peripheral to another one.

## PARROT DF7220

With the Parrot Digital Frame 7" DF7220 you can share your favorite photos with your friends. Easily transfer photos wirelessly via *Bluetooth*, by inserting an SD/MMC card or by connecting a mini-USB cable to your PC. It's easy to create your own slideshow with up to 300 photos stored in its internal memory. And you can change the interchangeable frame surround to suit your interior or mood.

### Features

- 7" LCD color screen.
- Display pictures sent via *Bluetooth*, and store up to 300 photos.
- SD/MMC slot and USB port built-in.
- Interchangeable frame surrounds.

new

## PARROT DF7630

Parrot presents a high-resolution digital frame for the world's photo lovers. You will be impressed by the extraordinary picture quality which captures even the finest details. Admire the photos stored on your PC, Mac®, digital camera or mobile phone by easily transferring them via *Bluetooth*, SD card or Mini-USB connection to the Parrot DF7630 frame.

### Features

- High-resolution 7" LCD color screen with 720 x 480 pixels.
- Displays photos sent via *Bluetooth*.
- Stores up to 400 pictures.
- SD/MMC card slot and mini USB port.
- Interchangeable frame surround available in a wide range of quality leather finishes.
- Ultra-slim frame that can be wall-mounted.

new

## PARROT DF7700+

More original than a postcard and even faster to use! With the Parrot DF7700+, you can share your holiday photos in high definition instantly, whenever and wherever you want. Around the corner, or around the world you can send photos directly to your parents' or friend's frame via MMS, complete with a text or SMS message. You can also email them to the frame from your laptop! Or, transfer them via the USB port or SD card slot. Whichever way you choose, you can make the most of the photos stored on your PC, Mac® or digital camera.

### Features

- High-resolution 7" LCD color screen with 720 x 480 pixels.
- Displays the pictures sent via MMS or email and stores up to 400 photos.
- Receives SMS and MMS messages with text.
- SD/MMC card slot and USB port.
- High-quality leather frame surround.

### Features

- Wireless stereo sound system.
- 30W RMS power output.
- *Bluetooth* v2.0 + EDR.
- Class D amplifier.
- Bass-reflex system.
- Touch-sensitive keys.

new

## PARROT PARTY Black Edition

Say goodbye to the crackly noise from your cell phone's speaker and instead stream your music wirelessly through the Parrot Party Black Edition. This unique personal-size stereo delivers sound with impressive power and precision. On the beach, in the street, with your friends... it will go with you everywhere and transform any place into a dance floor. Easily listen to your playlist from any *Bluetooth* stereo source or use the 3.5mm line-in jack.

### Features

- 6W nominal power output.
- Class-D amplifier.
- *Bluetooth* v2.0 + EDR.
- Rechargeable NiMH battery for 8 hours of non-stop music!
- Two audio effects (Stereo Widening and Virtual SuperBass).
- Dimensions 9.0 x 3.1 x 3.3 in, weight 23 oz.

## PARROT DS3120

The Parrot DS3120 is a hands-free phone system AND an FM stereo receiver/sound system capable of playing music from a wide range of sources: *Bluetooth*, FM radio, USB flash drive, SD/MMC card and MP3 players. It delivers powerful, crystal-clear sound with a 20W output. And with its built-in microphone, you can make and receive calls hands-free with your *Bluetooth* cell phone. The 1.8" color screen and attractive user-friendly, attractive interface enables you to set the alarm and view the track titles.

### Features

- Digital FM RDS radio with 20 presets.
- 20W RMS power output.
- *Bluetooth* V2.0 + EDR wireless technology.
- Multi-connectivity (USB, SD/MMC, jack).
- Hands-free cell phone function.
- iPod-compatible.
- Plays MP3/WMA/AAC/SBC files.
- Alarm feature.

accessory

## PARROT USB DONGLE

Connect the Parrot USB DONGLE to your PC and enjoy the wireless freedom of *Bluetooth*. Stream your music to your Parrot stereo or transfer your photos wirelessly from your PC to your Parrot digital frame effortlessly. So much fun!

### Features

- *Bluetooth* v2.0 + EDR.
- Maximum transfer rate 3Mb/sec.
- Reception up to 33 feet.
