

PARROT DS3120

Wireless Digital MP3 Radio

www.parrotsound.com

The radio that does it all

Imagine a digital device that wakes you in the morning with stereo music from your MP3 playlist, favorite FM station or other source. Then, responding to the touch of a button, locates a number and makes a phone call for you. Now imagine easy-to-use controls with all the functions displayed on a bright color screen. There's no need to imagine it – the Parrot DS3120 is here.

Intuitive interface

Whether it's setting the alarm, tuning stations, cueing music or making calls, nine pushbuttons and a color screen put you in control of what's going on. You'll soon master the wide range of capabilities – and discover how much pleasure and convenience this special radio can bring to your life.

Music from everywhere

In addition to its FM stereo radio, the versatile Parrot DS3120 receives wireless streaming music from *Bluetooth*® A2DP devices, or from wired analog sources via a line-in jack. You can operate it on AC or battery power for indoor or outdoor convenience.

Premium looks and sound

Expect more than "table radio" sound from your music? The Parrot DS3120 delivers it, with a built-in 20-watts RMS Class D amplifier and two full-range speakers. Stereo Widening and Super Bass audio effects add richness to your listening experience. The upright, matte-finish cabinet is designed with enhanced acoustics, and features front and center controls. Its sleek modern style and flush mounted cloth grille harmonize with any decor.

Call without holding a phone

Besides being a great radio and compact stereo, you can make and take speakerphone calls with the Parrot DS3120. Pair it once with your *Bluetooth*-enabled cell phone and your phonebook will automatically synchronize. Other features include advanced noise reduction / echo cancellation, dual pairing (for alternating calling and music streaming), a color TFT screen and more.

PARROT DS3120

Radio, wireless MP3 stereo and speakerphone... all in one

Bluetooth wireless technology

Bluetooth wireless technology enables voice and data to be sent via a short distance radio link. It connects a wide range of electronic equipment without requiring additional cables. It extends the communication possibilities for cell phones and a large number of other devices. The Bluetooth A2DP profile uses the same frequencies and can be used to send music tracks from one device to another.

Phone and device compatibility

Parrot products are 100% Bluetooth compatible and work with most every Bluetooth A2DP cell phone. Visit www.parrot.com to find out whether your phone or device is compatible. Bluetooth A2DP-enabled products include these brands: Asus, Audiovox, BenQ, BlackBerry, Eten, Grundig, HP, HTC, I-Mate, LG, Motorola, NEC, Nokia, Palm Treo, Panasonic, Qtek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony Ericsson, SPV, Telital, VK mobile and more.
