

# Parrot CONFERENCE

## A wireless teleconferencing system

The Parrot CONFERENCE is the first *Bluetooth* hands-free teleconferencing system fully dedicated to mobile phones. Its specifications are unique: wireless, built-in rechargeable batteries, high-resolution colour screen, integrated Skype™ interface, optimised connectivity for all *Bluetooth* phones.

## Suited to every situation

Designed for use in large meeting rooms, as well as offices and suites, the Parrot CONFERENCE features three high-sensitivity microphones for effectively picking up everyone's voice over 360°. Its wireless design means that it can be moved from one room to another to suit requirements.

## Useful information displayed at anytime

The colour screen of the Parrot CONFERENCE displays the phonebooks, your contacts' numbers, their identifier and the user settings. The built-in 12-key digital keypad allows for speed dialling if required.

## Simplified calls over the Internet (VoIP)

The Parrot CONFERENCE is fully integrated with Internet communication software, especially Skype™: you can access your phonebooks and organise teleconferences over the Internet with the greatest of ease thanks to the specific menus.

## Unrivalled acoustic quality

Benefiting from Parrot's experience in signal processing, the Parrot CONFERENCE system features a 5W hi-fi speaker and specific echo cancellation for crystal-clear full-duplex conversations.

## Universal *Bluetooth* compatibility

Just like all the other hands-free kits in the Parrot range, the Parrot CONFERENCE is 100% *Bluetooth* compatible, meaning that it works with all *Bluetooth* mobile phones.

  - OPP (Object Push Profile)
  - SYNC (Serial Port Profile)
  - PBAP (File Transfer Profile)
- Maximum range: (10 meters)
- Phone pairing: by PIN code
- Updating via *Bluetooth*
- Pairing: up to 50 phones or devices

#### Processor

3x Parrot P4+ microprocessors @ 64 MHz  
Memory: Flash = 32 Mbits - SRAM = 4 Mbits

#### Dimensions

Max. width: 277 mm – 10.9 inches  
Max. depth: 255 mm – 10.0 inches  
Thickness: 55 mm – 2.2 inches  
Weight: 641 g – 22.6 oz

### BLUETOOTH WIRELESS TECHNOLOGY

The *Bluetooth* wireless technology enables voice and data to be sent via a short-distance radio link. It connects a wide range of electronic equipment without requiring additional cables. Furthermore, it extends the communication possibilities for mobile phones and a large number of devices.

### PHONE COMPATIBILITY

As Parrot products are 100% *Bluetooth* compatible, they are compatible with almost every *Bluetooth* mobile phone. Refer to [www.parrot.com](http://www.parrot.com)  
Example: Alcatel, Asus, Audiovox, BenQ, Blackberry, Eten, Grundig, HP, HTC, i-Mate, LG, Motorola, NEC, Nokia, Palm / Treo, Panasonic, Philips, Qtek, Sagem, Samsung, Sendo, Sharp, Siemens, Sony Ericsson, SPV, Telital, VK mobile...
