

Parrot CONFERENCE

A wireless teleconferencing system

The Parrot CONFERENCE is the first *Bluetooth* hands-free teleconferencing system specifically designed to work with mobile phones. Its features are unique: hands-free wireless *Bluetooth*; built-in rechargeable batteries; high-resolution color screen; integrated Skype™ interface; optimized connectivity for *Bluetooth* phones.

Suited to every situation

Designed for use in large meeting rooms as well as offices and suites, the Parrot CONFERENCE features three high-sensitivity microphones for effective 360° voice pickup. And, its wireless design means that it can easily be moved from one room to another as needed.

Useful information displayed at any time

The color screen of the Parrot CONFERENCE displays the phonebooks, your contacts' numbers, their identifier and the user settings. The built-in 12-key digital keypad allows for speed dialing if required.

Simplified calls over the Internet (VoIP)

The Parrot CONFERENCE is fully compatible with Internet communication software, especially Skype™. With it, you can access your phonebooks and easily organize teleconferences over the Internet thanks to its helpful menus.

Unrivalled acoustic quality

Benefiting from Parrot's experience in signal processing, the Parrot CONFERENCE system features a 5W hi-fi speaker and advanced echo cancellation technology for crystal-clear, full-duplex conversations.

Universal *Bluetooth* compatibility

As with all Parrot hands-free kits, the Parrot CONFERENCE is 100% *Bluetooth* compatible so it works with virtually all *Bluetooth* mobile phones.
