

Parrot PHOTO VIEWER 7"

wireless Bluetooth® photo frame

www.parrot.com

The Bluetooth digital photo frame

Display and share your most important photos digitally by sending them from your Bluetooth mobile phone* or PC to the Parrot PHOTO VIEWER 7". Say goodbye to memory cards and connecting wires. All the photos are transferred wirelessly by Bluetooth within seconds after taking a shot.

Portraits... landscapes...

The Parrot PHOTO VIEWER 7" can be used both horizontally and vertically. The photos and pictures stored will automatically be rotated and resized to match the position of the digital photo frame.

High-resolution digital color screen

Your most memorable photos deserve the very best in display technology. The wide TFT screen displays up to 262,144 shades of color for bright, contrasting photos with a resolution of 720x480 pixels. The display can be customized by adjusting the brightness.

Brightness suited to all surroundings

The backlight of the Parrot PHOTO VIEWER 7" screen automatically adjusts to the brightness of your room. The optical sensor acts like a dimmer switch; it increases or reduces the screen brightness according to the surrounding light. Less light at night, more light during the day.

See your photos in a slideshow

The Parrot PHOTO VIEWER can store and display over 500 photos and pictures in JPEG format. Regardless of your photo's size and resolution, the Parrot digital frame automatically adapts it to the TFT screen. You can even chose to display one photo in freeze-frame, or all 500 in a continuous slide show. If you don't want to feature all 500 in a slide show, select only those you do wish to see in slide show mode.

Contemporary design

The frames of the Parrot PHOTO VIEWER 7" uses natural materials. They are available in a variety leather and wood finishes that are suited to every interior style and design.
