**COM Configuration Ford**

The wires corresponding to the Ford protocol configuration must be connected correctly to your car stereo's information. It is important to follow the wiring diagram for your vehicle. We would advise our customers to have the interface fitted by a professional

N°		Color	Function	Connectors
6		Purple	V1	
Not Used		White	V2	

Connect the purple wire corresponding to V1 to pin 6.

Connect the white wire corresponding to V2 to ground plug.
