

Parrot supplies top-of-the-line *Bluetooth*® features to Navigon's new Personal Navigation Device

Paris, September 19th 2007 – Parrot, one of the leaders in wireless peripherals around the mobile phone, announces today that it supplies key *Bluetooth* features to Navigon's new Personal Navigation Device. Navigon will start selling its new PND today, the P'9611 by Porsche Design Group, a best-in-class portable navigation device for the discriminating consumer.

Along with a large high-contrast touch screen, high-quality speakers and a thoughtfully-designed cradle, it includes leading-class telephony features supplied by Parrot. Like all Parrot car kits, the P'9611 Porsche Design offers automatic synchronization of the phone book, direct calls to POIs and a high-level audio quality, using the "Parrot Beamforming" signal processing technique, thanks to its two built-in microphones.

The P'9611 Porsche Design will be available along with the rest of the Navigon product range.

NAVIGON also offers professional navigation solutions with the new 'Right' product range for logistic fleets as well as automotive components for driver assistance systems. Founded in 1991, NAVIGON employs more than 350 people and has offices in Asia, Europe and North America. – NAVIGON. And the world is yours.

ABOUT PARROT

Founded in 1994, Parrot has rapidly established itself as a pivotal global player for wireless mobile telephone accessories. Drawing on its tried-and-tested expertise on voice recognition and signal processing technologies, Parrot was one of the very first companies to produce *Bluetooth*[®]-based wireless hands free car kits, having identified this standard's vast potential as early as 1999. In 2006, Parrot sold about 3 million units. Determined to accompany the wireless peripherals' irresistible breakthrough into our day-to-day lives, Parrot has been developing since 2006 a new wireless range of sound and image products. Today, Parrot truly has a major international focus: 90.5% of its sales are generated outside of France, and a large percentage of its production is outsourced to carefully selected partners, enabling it to achieve the best possible level of quality and responsiveness. Parrot is now particularly well positioned to capitalize on the bright future opening up for mobile telephone devices. Parrot has achieved strong growth in its consolidated revenues, up from 80.9 million euros pro forma in 2005 to 166.9 million euros in 2006.
