

**Parrot DS1120:
Winner of the Bluetooth SIG Best of CES contest in the
Music category**

Paris, January 9th 2007 – Parrot, the leader for wireless peripherals around the mobile phone, is proud to announce that the Parrot DS1120, its new set of wireless stereo Hi-Fi speakers, has been awarded the 1st place in the Bluetooth Special Interest Group Best of CES contest in the Music category.

The Parrot DS1120 plays your favourite tracks from any *Bluetooth*[®] Stereo (A2DP) music source with amazing Hi-Fi quality. Packed in a pure and compact design, it works seamlessly with a *Bluetooth* mobile phone, MP3-player or laptop, delivering unrivalled sound quality anywhere in the house or the office.

In its third annual Best of CES Contest at the Consumer Electronics Show in Las Vegas, the Bluetooth SIG highlights the most innovative and consumer-friendly new *Bluetooth* enabled products. Winners were announced at the 10-Year Celebration party of the Bluetooth SIG at Tao in the Venetian Hotel on Tuesday, January 8th.

“We are delighted to see the Parrot DS1120 named as the winner in the Music category. It is recognition of Parrot’s non-stop quest for innovation,” says Henri Seydoux, founder and CEO of Parrot. *“The Parrot DS1120 has been designed to provide a seamless connection to a wide range of audio sources while delivering optimal audio performance. Its wireless design provides more flexibility than any traditional stereo, which makes it ideal for the home environment.”*

The Parrot DS1120 will be available in Q2 2008 for an MSRP of 199 Euros.

- Profiles supported :
 - A2DP (Advanced Audio Distribution Profile)
 - AVRCP (Audio/Video Remote Control Profile)
- Maximum range : 10 metres
- Pairing : by PIN code
- Updates via *Bluetooth*

ABOUT PARROT

Founded in 1994, Parrot has rapidly established itself as a pivotal global player for wireless mobile telephone accessories. Drawing on its tried-and-tested expertise on voice recognition and signal processing technologies, Parrot was one of the very first companies to produce *Bluetooth*[®]-based wireless hands free car kits, having identified this standard's vast potential as early as 1999. In 2006, Parrot sold about 3 million units.

Determined to accompany the wireless peripherals' irresistible breakthrough into our day-to-day lives, Parrot has been developing since 2006 a new wireless range of sound and image products.

Today, Parrot truly has a major international focus: 90.5% of its sales are generated outside of France, and a large percentage of its production is outsourced to carefully selected partners, enabling it to achieve the best possible level of quality and responsiveness. Parrot is now particularly well positioned to capitalize on the bright future opening up for mobile telephone devices.

Parrot has achieved strong growth in its consolidated revenues, up from 80.9 million euros pro forma in 2005 to 166.9 million euros in 2006.
